# Technology Forum Diagnostics & Bioanalytical Devices 2008

## Science & Industry Partnering

Partnering at Technology Forum Diagnostics & Bioanalytical Devices is about bringing people together from science, clinics and industry to boost sustainable cooperations and business partnerships by

- accelerating knowledge transfer from science to industry
- initiating cooperations between academia and industry
- supporting business development of European biotech, pharma and diagnostic companies

Our partnering system is tailored to the life science sector and to the diagnostic community. It enables you to identify networking and business partners and helps you to initiate and create sustainable, long term cooperations and business partnerships. Specific features include:

- partnering profiles from all participating academic institutions and companies
- presentation of your offers, whether patents, licences or cooperation proposals
- unique access to offers and inquiries of European Enterprise Network, EDMA, EFCC, IFCC and WASPALM linking you to major European and international networks
- life science-specific search engine for detailed searches in profiles, technology offers and cooperation proposals
- personalised e-mail alerts on new participants, technology offers and proposals
- opportunity to prearrange private meetings with hand-selected participants online and to meet with a number of renowned scientific organisations, biotech and pharma companies in one place during the two-day-event
- access to the partnering-system even after the event: access to the contacts and partnering profiles for a further six months and thus a means of consolidating existing contacts by using our online presentation and meeting tools

### **If you have questions, please do not hesitate to contact**

Dr. Andreas Scriba

Association of German Biotechnology Companies VBU
