Invitation

The biannual conference series "Green Solvents" has been established as an important international forum for the discussion of modern approaches to sustainable solution phase processes. Right from its start in the year 2002, the meeting has attracted well above 200 molecular scientists and engineers with a healthy mix of academics, industrialists and students from all over the world. With previous editions focusing on "Catalysis", "Synthesis" and "Processes", the 2008 edition aims at a broad evaluation and critical discussion of the current state of the art for alternative media in chemistry and chemical engineering, biotechnology, materials sciences, and related areas.

The scientific programme consists of keynote lectures, oral contributions, and posters with no parallel sessions. The poster presentations form an integral part of the discussion following the successful experience of the previous meetings.

The picturesque setting at Lake Constance provides an ideal location for stimulating scientific discussion and networking. The social programme includes an excursion on Sunday afternoon to the Isle of Mainau and a boat trip on the Lake Constance on Tuesday night.

We look forward to welcoming you at an exciting meeting in the beautiful environment at Lake Constance.

Organising Committee

W. Leitner, RWTH Aachen and Max-Planck-Institute for Coal Research, Mülheim/D, *Chairman*

K.R. Seddon, QUILL, Belfast/UK

P. Wasserscheid, University of Erlangen-Nuremberg/D

D. Demtröder, DECHEMA e.V., Frankfurt am Main/D

B. Feisst, DECHEMA e.V., Frankfurt am Main/D

Location

„Graf-Zeppelin-Haus“
Olgastraße 20
88045 Friedrichshafen/Germany
